(54) SPORTS GRIP

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a sport grip in which display indicated on a display part at a grip end can be positioned always in an easy-to-see state and a weight can be easily adjusted.

SOLUTION: The sports grip where an end cap provided with a display part on the surface is attachably and detachably mounted on one end side of a grip body, has a nearly cylindrical shaft fitting hole inside. Thickness is tapered toward the other end side of the grip body, and a single belt-shaped flat part extending toward the longitudinal direction of the grip is formed on the inner face of the shaft fitting hole.
